*Trust, confidence and peace of mind – the watchwords by which Recordsmanagement has established a reputation that is second to none. From creation to destruction, birth to death, your valuable documents and data are in safe hands.*

## Welcome to Recordsmanagement!

Information is the single most valuable asset managed by any organisation today. The ability to quickly identify, locate and access important documents or data can mean the difference between success and failure.

It is for this reason that you need to know that your records are being stored safely, securely and in compliance with all relevant data protection legislation. When a document is required, you need the assurance that it will be delivered – as, when and where it is wanted.

Providing this assurance to a varied and diverse range of blue-chip companies and public bodies is a huge responsibility, and not one that Recordsmanagement takes lightly. We pride ourselves on being a professional, dedicated records' management provider, and it is this determination to set and maintain high standards that has assured our status as one of the leading document storage partners in the South of England.

### FileStore Wins Award

FileStore was pleased to be invited to join many of the South's leading businesses at the prestigious 2011 Business South Exhibition. The event provided a great opportunity to network with other established Hampshire businesses, to hear the very latest thinking in business innovation and growth, and to meet up with customers and suppliers alike. It was particularly good to see so many familiar faces, including...

*Entrusting an unknown third party with the storage and management of your valuable information assets is never an easy decision.*

## Document Storage & Archive Materials

At Recordsmanagement, we understand these concerns, and do all we can to provide our customers with the reassurance that we are responsible custodians of their archives.

Recordsmanagement's warehouses in Hampshire comprise over 100,000 square foot of storage space, and are subject to 24 hour manned security, RedCare fire and intruder alarm systems, and CCTV. There is no public access to the storage premises, and (due to the nature of some of the records we store) all Recordsmanagements staff are subjected to Ministry of Defence vetting. We intentionally do not use refurbished farm buildings or barns, but provide a high quality, clean, safe and secure environment for our customers' property. Visit our [Security](#) page for more information.

Recordsmanagement operates a fully-barcoded and electronic box and file tracking system, using our bespoke Storage Manager database. Every movement of every item – including the initial uplift of the box/file, every occasion on which it is retrieved and collected, and the date it is destroyed – is automatically recorded on our system in order to create a comprehensive audit trail. Our [Archive Tracking and Audit Trail](#) page provides full details.

Central to our service provision is the assumption that our storage areas and archiving team are simply an extension of our customers' own facilities and resources. In short, we provide our clients with the space, software and expertise to complement their own – either as a fully outsourced solution, or as a partner to their own team of archivists.

Recordsmanagement also supply a range of archiving materials, including strong and durable boxes of various sizes, specialist drawing tubes, and box inserts – all designed specifically for long-term use. Our [Support Services](#) page provides a full catalogue of the archiving materials supplied.

**Meridian Norstar**

Avaya IP Office  
**Meridian Norstar**  
Panasonic

The Norstel telephone system family comprises of the following systems: the Compact 616, Compact Plus, Modular Plus and Business Communications Manager (BCM).

Two of the key benefits of the Meridian Norstar and BCM range is that they all utilise the same digital handset range and that they have an almost identical set of features. Each Norstar and BCM system has a different capacity of extensions and lines which can be tailored to the size of your business now and as it grows.

The Meridian Norstar Compact Plus system has capacity for up to 8 lines plus 17 extensions or if your business needs something bigger its 'big brother', the Modular Plus, starts at 30 lines plus 32 extensions and will grow to over 160 extensions. Add the Startalk or Call Pilot voice processing unit to provide powerful auto-attendant and voicemail facilities.

The Norstel BCM50 is a natural upgrade path from the Meridian Norstar systems. Incorporating additional features to the Norstar range including IP telephony, unified messaging, call center applications, interactive voice response and many more.

**Summary**

- I Scalable system range
- I Analogue or ISDN line connectivity
- I Range of digital handsets
- I Feature packed
- I Easy to use
- I Voicemail and Auto-attendant
- I Available as a 2nd user system
- I Cost effective upgrade route
- I Compact or Modular Plus options

**About Us**

Portsmouth Communications was established in 1994 and has consistently achieved registration and certification of ISO9001 and Investors in People. Our head office is located within Hampshire so we are ideally located to service companies based on the M27, M3, M4 and A3 corridors.

Our engineers are either BT (Major Business Systems) or MOD trained and have a vast amount of experience and capability in the provision of business telephone systems, network cabling and audio visual systems for any size of organisation.

We also specialise in 'large site' voice and data infrastructure including Cat5e/6/7 & all types of fibre optic installation services. Please refer to our client list for further information on the types of environments.
